Unit 8: SCIENCE

Lesson 8J: Review

REVIEW UNIT 8

Student Book – page 105

Read the texts. Circle the correct option (a–d).

TV opportunity!

Great Inventions is a new TV show and we are looking for young people to take part. Interested? We invite you to make a two-minute video that shows your idea for a new invention. Make sure you include:

- personal details: name, age, and address.
- the name of your invention, how you got the idea and how it works.

You can email us your video or send it to the address shown on our website. We'll choose the ones we think are most interesting. Your prize? The chance to appear on our TV show!

- 1 What do the programme makers want?
- a new inventors
 - b experienced film makers
 - c young TV presenters
 - d young actors

20th-century inventions

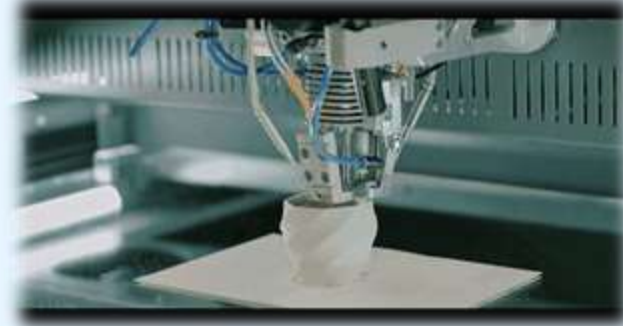

The most important modern invention has to be the mobile phone. It was only invented in the 1970s, but look at it now! Everyone has a phone. Originally, of course, phones were large and were only used to make phone calls. Now those phones are in museums! Modern mobile phones are mini-computers – you can do so much with them. You can buy very expensive phones, but you can also buy cheap models. That's why, in my view, it's the best 20th-century invention.

- 2 What is the purpose of the text?
- a to advertise mobile phones
 - b to invite people to a museum exhibition
 - c to give an opinion about an invention
 - d to advise people to avoid cheap phones

3D printers

3D printers are a new kind of machine that can make everyday objects. They're amazing because they can produce different things in different materials, from cups and plates to plastic toys and even chocolate cakes! So how do they work? First you design a 3D object on your computer, then you connect it to a 3D printer. Press 'print' and watch it work. The printer makes the object in very thin layers, like the pages of a book – one on top of the other until you have a complete object.

- 3 What is the writer of the text doing?
- a giving an idea about the future of printers
 - b** describing an invention
 - c giving a short history of an object
 - d explaining different inventions

3.23 Listen to the text. Are the sentences true or false? Write T or F.

- 1 Galileo invented the telescope. **False**
- 2 Galileo immediately used the telescope to study space. **True**
- 3 The United States sent the first person into space. **False**

Work in pairs and do the task below.

Sample: I bought this phone last week in your shop. Suddenly it stopped to work properly. The problem is with the WiFi and with the camera. The phone can't connect to any WiFi and the pictures are coming out horrible. Just look! I would like to get it fixed as soon as possible. If you can't make it I would like to get money refund.

Read the task below and write the letter.

Sample

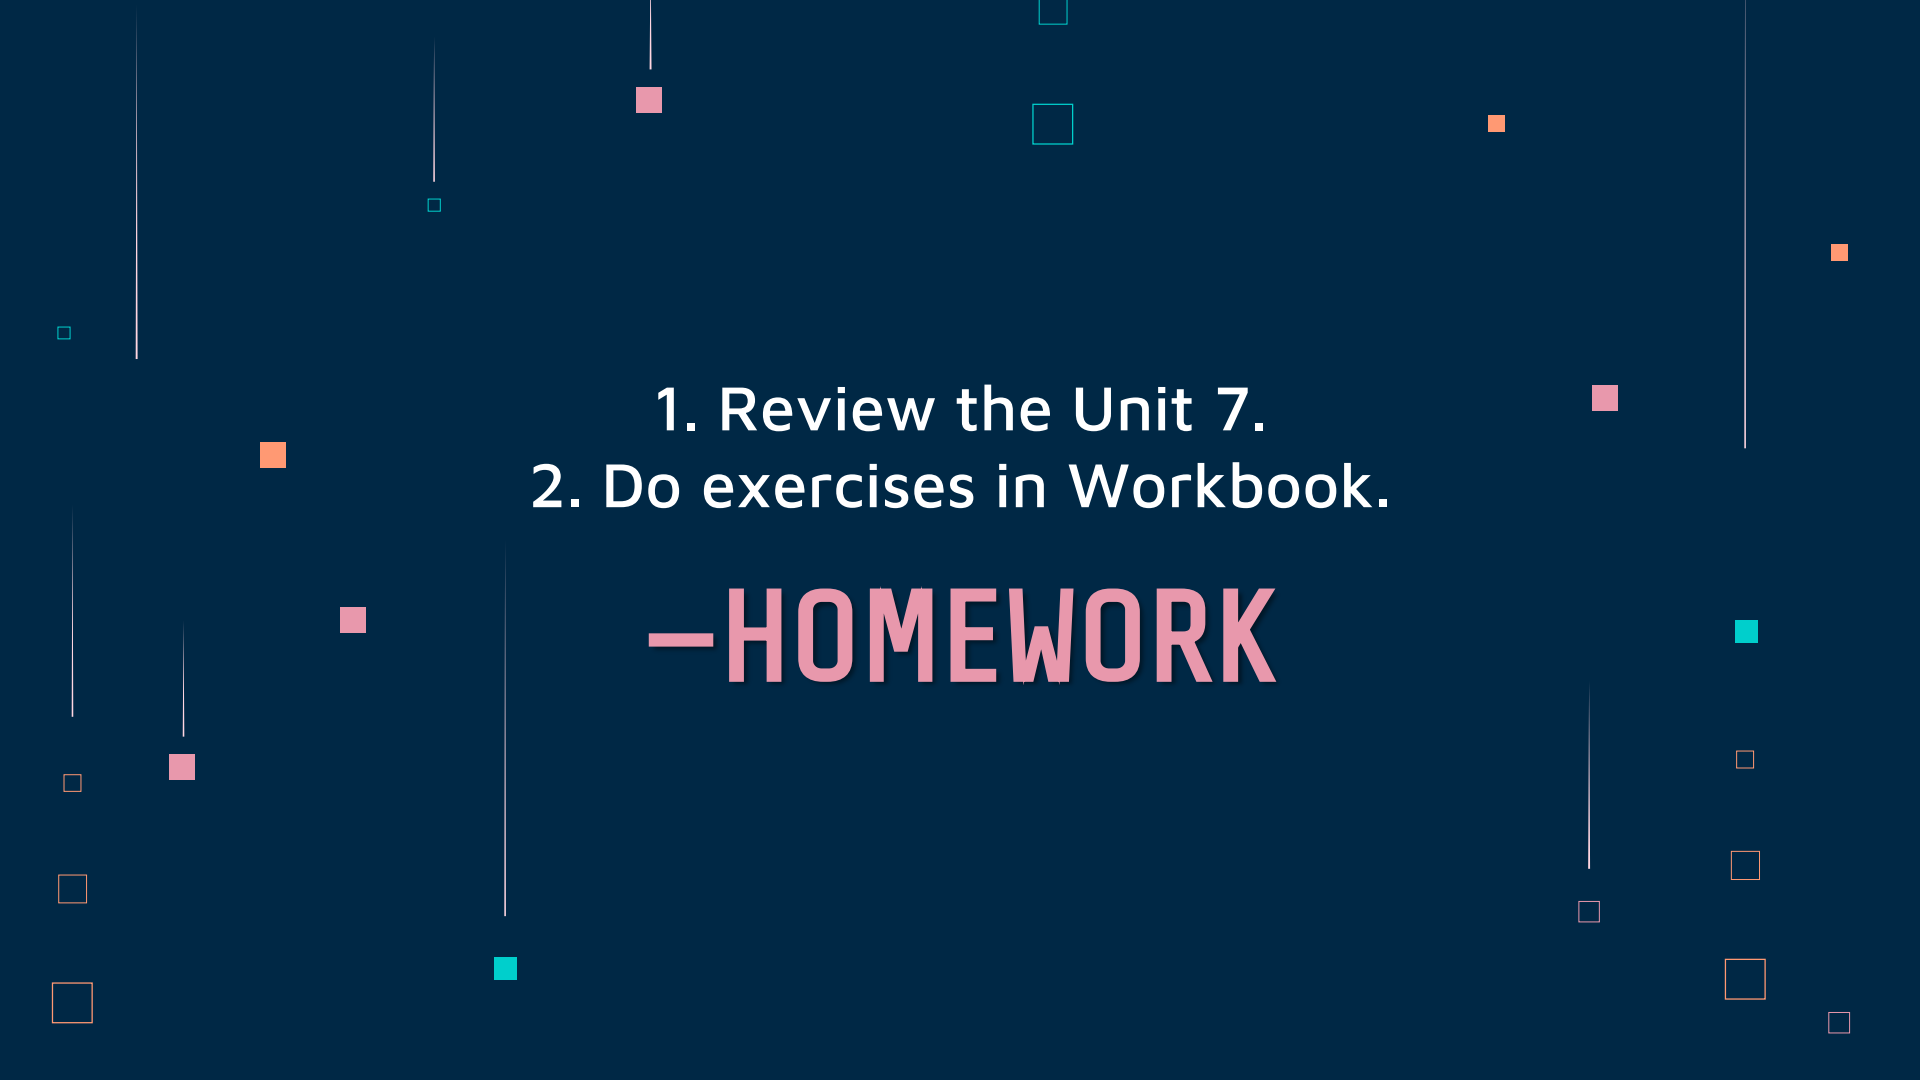

Dear Sir/Madam,

I am writing to express my dissatisfaction with my recently purchase from your website. I ordered a tablet online 3 weeks ago, my order number is #0123456. It arrived yesterday, unfortunately there is some problem with my tablet.

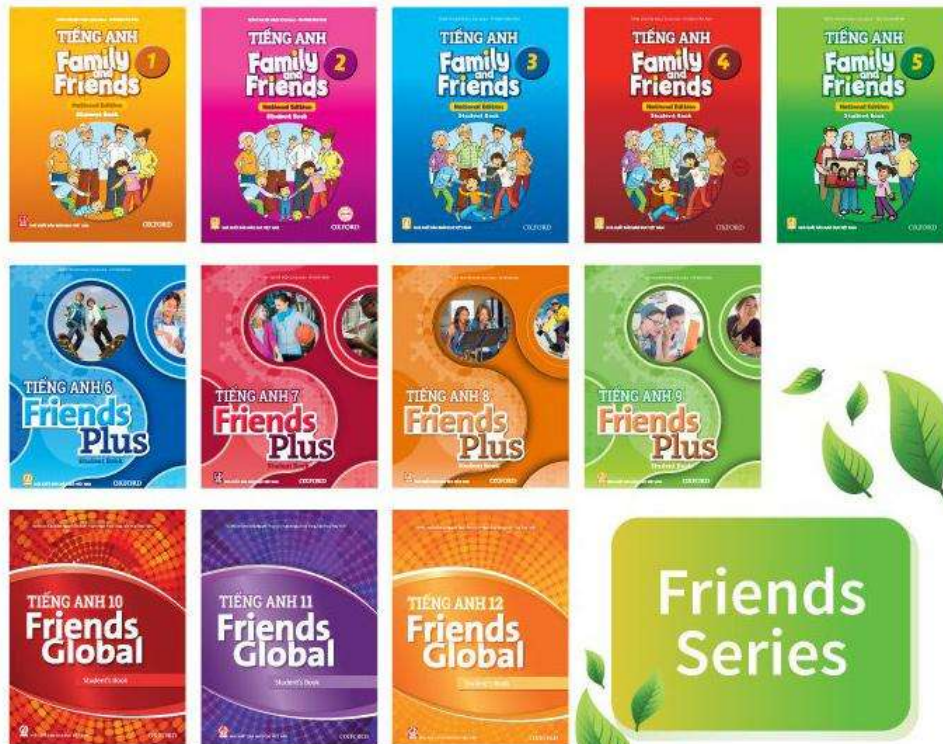

Firstly, when I looked the photos on your website, the tablet is brown, but when I received it, I realized that it is orange. Moreover, there is a problem with the touch screen. It is not sensitive as advertised.

I would like you to respond quickly by either giving my full refund or by exchanging a new one for me.

Thank you for your time and consideration. I look forward to your services.
Yours faithfully,

- 
1. Review the Unit 7.
 2. Do exercises in Workbook.
